

AUTODESK TRAINING CENTER

The Pacific Center for Advanced Technology Training (PCATT) offers at Honolulu Community College the only AutoDesk Authorized Training Center (ATC) in the State of Hawai'i. Our networked computer labs offer high-end equipment to maximize your training experience. The Center provides comprehensive training to professionals with state-of-the-art AutoDesk software using curriculum, hardware, and instructors certified by AutoDesk.

Certification and Assessment Exams

While ATC courses have no required examinations, they are excellent preparation for the Assessment Exams AutoDesk has launched to help end users determine their level of technical competency. The Assessment Exams have replaced the End User Certification Exams. The new Assessment Exams are now delivered via the Web, so professionals may take an exam at their desks or at the ATC using a Web browser. Since this is the only exam series recognized by AutoDesk, assessment results are recognized worldwide. Contact the Training Center for more information on taking these exams.

Course Offerings

Courses offered at the ATC are conveniently scheduled and are designed to help professionals learn the key elements of AutoDesk software so they can be "faster, smarter and better" in their use of CAD technology.

- Introduction to AutoCAD
- AutoCAD 2000i Overview
- AutoCAD 2000i Level 1
- AutoCAD 2000i Level 2
- 3D Studio VIZ Level 1
